

SparkView

MOTORTECH HIGH VOLTAGE INDICATOR

MOTORTECH SparkView HIGH VOLTAGE INDICATOR

The SparkView is a new handheld device developed by MOTORTECH that can monitor the high voltage required by the spark plug while the engine is running. With a measuring clamp or cable and the display for up to 40 kV, it is easy to determine the condition of the spark plugs and the time at which they need to be replaced. This guarantees a constant performance of the engine and a maximum utilization of the spark plugs.

Quick and comfortable monitoring on a running engine makes it possible to detect

- Wear of spark plugs
- Failure of the ignition system (damaged ignition coil, high tension lead or ignition controller)
- Faulty compression of a cylinder

Watch our SparkView application video on:
www.youtube.com/MOTORTECHgmbh

Technical data and features:

- Measuring of high voltage with SparkScan1 (capacitive current clamp) or direct measuring on a coil with a measuring output (BNC connector)
- Measuring range 40 kV (resolution 1 kV)
- Maximum pulse frequency 50 Hz (corresponding to 6,000 rpm with a four-stroke engine)
- Scale with 3 colors, adjustable color ranges, settings are saved
- Display of maximum value
- Adjustable brightness for outdoor and indoor use
- Powered by 3 standard AA batteries
- Status display for batteries
- Auto shut down
- Case made of shock-resistant high quality materials
- Available in two different versions with carrying case

SparkView – High Voltage Indicator

P/N		Description
06.90.099-100	1	SparkView high voltage indicator – kit including SparkScan1 inductive high voltage clamp and carrying case
06.90.099-105	2	SparkView high voltage indicator – kit including BNC cable and carrying case
